### INTRODUCTION

The Quattro Elite H.I.D Xenon & Halogen driving lights are an Australian designed and assembled lamp, which is manufactured from the very latest high tech, composite materials. They feature a die-cast aluminium free form reflector, which acts as a heat sink, ensuring maximum bulb life.

The design team have researched the very best features required in a driving light and have combined it into one ultimate lamp.

The Quattro Elites H.I.D Xenon lamps feature a multi-volt internal ballast and are available in 35W, 55W & 70W.

The Quattro Elite has a heavy duty, easy adjust mounting bracket which supports 1/3 of the lamp body.

All lamps come complete with clear lens covers and a wiring harness.

### TESTIMONIALS

*Just to let you know how happy we are with the 55W HID Quattro Elite lights we received from you guys. On a recent trip through some scrubby country at night we had no trouble seeing everything. I have had other lights on previous vehicles but can honestly say these are by far the best. On the highway the depth of field is amazing; the combination of the spread and pencil works really well. They make night driving a pleasure. The quality and build is first class and fitting was simple. Keep up the good work.*

*P.D - Queensland*

*Thanks for recommending the Quattro Elite 70W driving lights. They are great!!!!*

*I regularly do night trips from Sydney to Lake Cargelligo in central NSW. Last week I travelled this road for the first time since putting on the new lights. I am very impressed*

*The lights are 2 spread beams and I could clearly see the road for approximately 2km. I was also able to pick up yellow reflective signs from approximately 6km I fully recommend these lights. They are great lights and are also easy to adjust.*

*Thanks again and I would fully recommend these to anyone and everyone.*

*D.M - Lithgow, New South Wales*
